Hi there, I hope you'll have a great day ahead of you. A little information about myself is that, I take my time in solving problems and learn ways on how I can come up with a solution. Because, believe me, there are millions of solutions to a one problem, and there's always that one solution that takes less time yet has a great impact in solving the issue, so choose your solution wisely. I think that sums up about a little information about me, and I'm sure we can get to know more as we progress.

PROJECTS

Capstone Project: Archiquest

- Project Stack: ReactJs, Python, Gemini AI API, HTML/CSS
- A web-based platform designed for Architecture students and teachers to help them practice their Cost Estimation Skills. AI analyzes architectural floor plan and automatically generates structural cost estimates using AI.
- Role: Full-stack Developer
- Github link: <https://github.com/immatchAA/cost-estimator>

Project U-Kay

- Project Stack: ReactJS, Java
- An e-commerce website that allows the user to buy and sell thrift clothings via online.
- Role: Full-stack Developer
- Github link: <https://github.com/kinatulinan/ProjectUkay>

FitFlow

- Project Stack: HTML, CSS, JS, Kotlin, Java, Springboot, Firebase
- A comprehensive fitness application offering personalized workout plans, smart meal suggestions, and activity tracking. Built specifically to motivate users through analytics and AI-driven plans.
- Role: Mobile Developer (Integrated the frontend and backend implementations)
- Github link: https://github.com/kimasaph/IT342_FitFlow

EDUCATION

Saint Cecilia's College	2009 - 2019
• Elementary (2009 - 2014) • Highschool and Senior Highschool (2014 - 2020)	
Cebu Aeronautical Technical School (Bachelor of Science in Aircraft Maintenance Tech)	2020 - 2021
• First year of College (2020 - 2021)	
Cebu Institute of Technology - University (Bachelor of Science in Information Technology)	2022 - 2027
• First year of College - Present	

AREA OF EXPERTISE

Frontend Development (HTML, CSS, Tailwind CSS, JavaScript)

UI/UX Designing (Figma)

Database Management (MySQL, Supabase, Firebase)

Backend Development
(Springboot, Django, FastAPI, Node.js)

Mobile Development (Kotlin using Android Studio, xml)

Graphic Design (Canva)

Automation
(EY ServiceNow, Puppeteer and Casper Scripts)

AI Prompts
(Google Antigravity, ChatGPT Pro and Claude Code)

EXPERIENCE

- On-going Internship at Jobtarget as Software Developer for 500-600 hours, currently in Export Team, where we handle automation and write or update scripts for Puppeteer or Casper scripts.
 - Autoconfirm - Auto confirms job postings if it is successfully posted or not.
 - Autoposting - Auto posts job postings that were created manually and connects to a script.
 - Autodelete - Auto deletes job postings that are expired so that it will not be stuck in job listings.
 - Auteedit - Auto edits job postings that needs update on their fields.
 - Formatter - Formats the input fields in a job posting dependent on the mapping.
- During the internship, I also had experience with web scraping where we scrape data from websites that can help us fix issues in job postings.
- During internship, we were focusing more on fixing bug issues from job postings that were stuck for couple of days and weren't posted, job postings that weren't deleted, job postings that weren't confirmed, generally job postings that are having issues being posted.
- Aside from that, I also had decent experience in building user-friendly and functional systems or websites for businesses using the areas of expertise I have.

CERTIFICATIONS

- C - Programming Certificate (May 12, 2024)
- HTML Certificate (February 11, 2024)
- Information Management 2 MySQL Certificate (CodeChum) (November 12, 2024)
- Data Visualization Certificate (September 19, 2024)
- AWS Academy Foundation and Architecting Certificate (September - October 2025)
- Proweaver Hackathon 2025

SOFT SKILLS

- Communicates and coordinate well with team
- Works independently and finish assigned task
- Decent attention to detail
- Ability to stay calm while working under pressure
- Problem analysis and solving
- Organizes tasks and manages time efficiently
